

UNITED STATES DEPARTMENT OF AGRICULTURE
Bureau of Entomology and Plant Quarantine
Washington, D. C.

BEPQ--367

September 21, 1934.

ADMINISTRATIVE INSTRUCTIONS

SHIPPING SEASON FOR TEXAS CITRUS FRUIT TO BEGIN SEPTEMBER 26.

(Issued Under Regulation 7, Section A, Federal Quarantine No. 64, as Revised Effective September 1, 1932)

(Approved September 21, 1934; effective September 26, 1934)

The issuance of permits for the shipment of citrus fruit of the 1934 crop under the Federal Mexican fruit worm quarantine (Notice of Quarantine 64) from the counties of Willacy, Cameron, and Hidalgo, in Texas, is hereby authorized to begin on September 26, 1934, so far as that quarantine is concerned. The host-free period required by the Department of Agriculture to be enforced by the State of Texas under Regulation 7 will for the year 1934 close on September 25.

The Department of Agriculture has evidence that such modification is desirable from the standpoint of Mexican fruit worm control and does not involve increase of risk of propagating that insect. All cleanup and other requirements concerning the production and distribution of Texas citrus fruit remain unchanged.

LEE A. STRONG, Chief,
Bureau of Entomology and Plant Quarant
